Re: Alteva, LLC
 911 Compliance Status Report
 WC Docket No. 05-196

Dear Ms. Dortch:

Alteva, LLC (“Alteva”), by its counsel, hereby submits this report in response to the FCC letter dated March 12, 2007, requesting that Alteva provide additional information regarding its compliance with the FCC’s 911 regulations. *See* Letter to William Bumbernick from Kathryn Berthot (March 12, 2007) (hereafter “Inquiry Letter”). As noted in Alteva’s November 21, 2005 Compliance Letter, Alteva presently resells to all of its end-user subscribers the VoIP services provided by New Global Telecom, Inc. (“NGT”), an unaffiliated company which is a wholesaler of VoIP services. *See* Letter to Marlene Dortch, FCC Secretary, from William Bumbernick, President/CEO of Alteva (November 21, 2005). NGT has informed us, as well as the FCC, that it has contracted with Intrado to provide end-user VoIP subscribers a nationwide 911 solution in full compliance with the FCC’s regulations. *See* Letter to Marlene Dortch, FCC Secretary, from Ron W. Wessel, General Counsel of NGT (November 23, 2005). Based on information provided by NGT and Intrado, as of March 16, 2007, Intrado has deployed a 911 solution in full compliance with the FCC’s rules to 4405 PSAPs in the U.S. Intrado is actively working to expand coverage to additional PSAPs. Attached as Exhibit A is a PSAP deployment spreadsheet highlighting the specific PSAPs that have been deployed by Intrado, and the target dates for those PSAPs that have not been deployed.

Alteva’s responses to the FCC’s specific inquiries are as follows:

Provision of Compliant 911 Service: Approximately 97.5% of Alteva’s VoIP subscriber lines receive 911 service in full compliance with the FCC’s rules. Attached as

Exhibit B, which is based on information provided by NGT and Intrado, is a chart summarizing Intrado's 911 network capabilities as applied to Alteva's VoIP subscriber lines.

911 Coverage: As shown in Exhibit B, 2.5% of Alteva's subscriber lines are in areas of the country in which Intrado has not yet deployed an FCC-compliant 911 solution. Exhibit A includes a detailed list of all PSAPs for which Intrado has not yet deployed an FCC-compliant 911 solution, and indicates, if available, the scheduled date for deployment.

911 Routing Information/Connectivity to Wireline E911 Network: Alteva is capable of transmitting 911 calls for 96.0% of its VoIP subscriber lines to the appropriate PSAP, designated statewide default answering point, or appropriate local emergency authority utilizing the selective router, the trunk line(s) between the selective router and the PSAP, and such other elements of the wireline E911 network as are necessary in those areas where selective routers are utilized. *See* attached Exhibit B. For 2.5% of Alteva's VoIP subscriber lines, Intrado has identified the corresponding PSAPs as having wireline E911 network capability, however Intrado has not yet interconnected with the wireline E911 network. In these cases Alteva (through Intrado) routes VoIP 911 calls via the PSTN to the PSAP's emergency administrative line. Exhibit A provides further detail on Intrado's schedule for PSAPs that are not yet deployed. The remaining 1.5% of Alteva's subscriber lines are in areas in which the PSAP does not currently use a selective router or there is some other limitation of the PSAP that prevents Alteva (through Intrado) from providing E-911 service.

New VoIP Customers and/or Marketing of VoIP Service in Non-Compliant Areas: As mentioned above, Alteva does not accept new VoIP customers in areas where it is not possible to provide 911 service in compliance with the FCC rules. Alteva currently serves a total of 60 subscriber lines, 2.5% of Alteva's total subscriber lines, in areas where Intrado has not yet deployed a 911 network solution that is fully compliant with the FCC's regulations (see Exhibit B), and of those, 59 were provisioned with new service after November 28, 2005. Alteva has procedures in place to ensure that no new subscribers are being provisioned in non-compliant areas.

Respectfully submitted,

/s/
